What To Check For

1 Look for unprofessional **spelling or grammar errors.**

2 Treat **any email you didn't expect to receive** with suspicion.

3 Check for **odd phrases and word choice** based on your knowledge of the sender.

4 **Hover over links** to see if the web address is legitimate and relates to the email's content.

5 Verify any email that asks for personal information by **independently looking up the sender's contact information.**
